NodeGraph
Your data starts here

NodeGraph is a data intelligence platform that helps your organization to trust, control and understand your data. NodeGraph is the only fully automated metadata extraction platform on the market, with functionalities ranging from data lineage visualization to unit and regression testing.

Confidently TRUST your data.
NodeGraph provides you with easy access and transparency of your company's data and its sources. Knowing the what, where when and why here it joins and where it goes gives you confidence that everyone is using the right data to make actual, rather than assumed, decisions.

Only ever use good QUALITY again.
Organisations want to be sure of the validity of its data. NodeGraph makes this is possible by tracking and tracing the origins, movements, and touchpoints of your data to provide insight into its quality and uncover its value.

Be in CONTROL of your data.
Being in control of your data means you can act confidently rather than reactively and it gives you the capability to scale. NodeGraph allows you to experience immediate control with comprehensive data transparency at your fingertips.

Enjoy full automation
Don't waste time, resource and money when the only fully automated metadata extraction platform on the market can do the work for you! Enable easy sharing of data throughout the organization, automate documents and testing and reduce errors.

Achieve company-wide collaboration
Better data understanding through collaboration can help a business to innovate and grow. NodeGraph's intuitive platform makes data sharing across an organization much simpler which helps ensure the right people understand the right data to deliver accurate results.
